SIDDHARTH PANDEY

LEAD DATA ANALYST - 8 YEARS

CONTACT

siddharth97.pandey@gmail.com

Bengaluru, India

+91 7999822189

SKILLS

- SQL
- Tableau
- Python
- Machine Learning
- A/B Experimentation
- Statistical Analysis
- Hypothesis Testing
- Resgression
- Classification
- Data Visualisation
- Data Wrangling
- Team Management
- Public Speaking
- Design Thinking

EDUCATION

B.Tech: Mechanical Engineering

Kalinga Institute of Industrial Technology

CGPA : 8.1 05/2014 - 06/2018

ACCOMPLISHMENTS

- Spot Award (06/2021) For playing pivotal role in project execution and simultaneously helping out in driving other projects
- Spot Award (11/2019) For outstanding dedication and maintaining deliverable quality to high standards
- 2nd Place for International Speech Contest Area Level - Toastmasters (04/2020)

INITIATIVES

- **R Trainer :**
  - Trained a batch of 15 on basics of
- **Event organizer :**
  - Organized multiple activities promoting wellness and connection among peers
- **Toastmasters Mentor :**
  - Trained mentees on the basics of public speaking, story telling and communication
- **Educational Sessions:**
  - Took educational session for the team on topics pertaining to Statistics and Experimentation

PROFILE

Sr. Business Analyst with 6 years of experience in the field of data analytics and sciences. I have an aptitude for art, design, communication, critical thinking and creative problem solving, experience in python, SQL, machine learning, statistics and data visualization

WORK EXPERIENCE

2026 **Garden City Games** (Lead Data Analyst)
Bengaluru, India
08/2025 - *present*

- Established and **led the analytics function** across **6 games generating $15M in annual revenue**, building analytical processes and supporting product teams with experimentation, feature analysis, and strategic deep dives.
- Led and mentored a team of 2 Data Analysts, providing guidance on analytical methodologies, experimentation, feature evaluation, and business problem-solving.
- **Integrated AI into the analytics workflow to accelerate insight generation** and enable business stakeholders to derive actionable insights faster.
- **Supported leadership on M&A initiatives** by analysing data on potential acquisition targets and providing analytical insights to support strategic decision-making.
- **Partnered with Data Engineering to develop analytics-ready data infrastructure**, enabling scalable reporting, visualization, experimentation, and downstream analysis across games.
- Established experimentation guidelines for product teams, standardizing experiment design and analysis practices to improve the quality and consistency of A/B testing

2023 **Zynga** (Data Analyst 2)
Bengaluru, India
12/2022 - *07/2025*

- Designed and led development of Dynamic Difficulty Tuning (DDT), a major core feature optimizing in-level difficulty for players to boost spends by improving their in game experience.
  - **Impact:** Increased **average revenue per user by 6%**
- Collaborated on the development of a level difficulty classification model, **achieving 62% recall**, enabling better difficulty tuning and level validation
- Built and maintained 10+ dashboards centering around overall health metrics and feature performances, including a custom tool that empowered the design team to identify issues and push fixes faster
  - **Impact: Cut down response time to issues by 4 days**
- Worked on optimizing the in-game store through combination of packs and bundles tailored to the players preference thereby increasing the overall daily revenue by **6%**
- Solely managed game analytics, leading deep dives on retention, revenue softness and experiment ramp-ups
- Supported BAU tasks: Custom dataset creation, segmentation, reporting, seasonal readouts, and health checks for newly released features and maintaining live operations

2022 **Unacademy** (Senior Data Analyst)
Bengaluru, India
09/2021 - 11/2022

- Discount Optimisation Strategy: Analyzed customer purchase behavior and identified optimal discount-price combinations.
  - **Impact:** Increased conversions by **33% and saved ₹16L in one month**.
- Built a real-time dashboard to monitor experiment results and conversion trends.
- Mid Funnel Conversion : Analyzed user engagement and funnel behaviors to map customer journeys and identify friction points.
  - **Impact:** Delivered actionable insights to improve user experience, increase conversion, and guide product experiments **improving overall inflow by 12%**.
- Partnered with stakeholders to design and evaluate A/B tests based on data-driven hypotheses

2018 **Mu Sigma** (Decision Scientist)
Bengaluru, India
06/2018 - 08/2021

Condenser Issue Prediction:

- Cleaned and prepped large datasets for anomaly detection in power plants.
- Conducted hypothesis testing, built visualizations, and developed a multilevel classification model which was deployed using Devops.
- **Impact:** Solution drove **$1.1M** in sales by accelerating issue identification across sites

Logistics Operational Efficiency:

- Led a 4-member team to deliver a Power BI dashboard for logistics network utilization.
- Collaborated on dashboard wireframes with clients and automated backend using **PySpark, Python**, and **Azure**.
- **Impact:** Enabled data-driven decision-making to optimize transport networks, reduce inefficiencies, and improve logistics performance

Sustainability Analytics:

- Built backend logic for a React-based dashboard showcasing carbon emissions across a logistics network; automated data flows via **Azure Data Factory**, supporting client hit sustainability targets
- **Impact:** Gave the client end-to-end visibility into logistics-related carbon emissions, supporting strategic initiatives toward sustainability goals
